

EDITOR'S NOTES

Don't forget – We have a new meeting place for meetings: The airport restaurant at Deer Valley Airport!!

stevenflarity@cox.net

PRESIDENTS COLUMN

This has been a pretty warm summer so far, which has kept the flying pilot count down a little. We are still seeing new people show up and I'm happy to say that our members do their best to help them. I watched our members assist a new flyer with an T-Rex recently. Initially he was a little terrified as everyone proceed to tear his helicopter apart, but when he got to fly it afterwards it was "a whole new helicopter".

That's what part of being a club is all about.

Earlier in the month you should have received an email concerning the meeting change to the Deer Valley Airport restaurant. I know that the club has met a Peter Piper since the dawn of time, but the members who do attend the meetings are growing tired of this venue. Deer Valley offers better food for those who want to eat and a little bit more aeronautical scenery. We will try this out and see what happens, hopefully it may result in increased meeting attendance.

I'll keep this month short. Please remember there is still a limited amount of fuel available at Mark Hargis's garage. I will not reorder until it is gone, the price is \$72 per case. Hope to see everyone at the meeting.

Eric

TECH TIPS

Here's a good technique for removing dents from a crashed muffler (from Run Ryder):

I've done the water and freez method....works exceptionally well BUT its not a throw it in the freezer and forget about it repair....first cover the exhaust w plastic, and plug the pressure port. then start to fill the pipe...once it gets to the top roll it side to side to fill the nooks and crannys filling as you go till its as full as you can get it. then cover

that with a rubber (no lie it works)👉 chuck it in the freezer and set a timer to check on it in 15 min....once it starts getting slushy decrease the timer to 5 min intervals....and start watching for the dent to work its way out....once its to your satisfaction pull it out and let it thaw out....though if the dent dosent come totally out the first time you can do it again and it will finish the dent off the second go round....I pretty much got this method down to a science I had a hatori basher pipe that I would freeze the dents out of on a regular....finally pushed my luck after the 6th time I did this and forgot about it in the freezer....split the entire side....oh well....

JOKES

"Doctor, please hurry. My son swallowed a razor-blade."

"Don't panic, I'm coming immediately. Have you done anything yet?"

"Yea, I shaved with the electric razor."

"Doctor, Doctor, You've got to help me - I just can't stop my hands shaking!"

"Do you drink a lot?"

"Not really - I spill most of it!"

"Doctor, doctor, will I be able to play the violin after the operation?"

"Yes, of course..."

"Great! I never could before!"

A man speaks frantically into the phone, "My wife is pregnant, and her contractions are only two minutes apart!"

"Is this her first child?" the doctor queries.

"No, you *idiot!*" the man shouts. "This is her *husband!*"

A doctor and his wife were having a big argument at breakfast.

"You aren't so good in bed either!" he shouted and stormed off to work.

By midmorning, he decided he'd better make amends and phoned home. After many rings, his wife picked up the phone.

"What took you so long to answer?"

"I was in bed."

"What were you doing in bed this late?"

"Getting a second opinion."
